

Any colour as long as it's green

Harris & Thompson is one of the leading decorators when it comes to eco products and the environment. We think it's important to respect the environment and want to try where possible to do our bit, We also recognise the importance of choice for our customers, that is why we offer eco friendly VOC 2010 Compliant products and paints .

This means you can have your bedroom, nursery, kitchen, sitting room etc. painted and be safe in the knowledge there won't be any nasty, toxic smells. You can move back in as soon as we've packed up our brushes.

Harris & Thompson will produce their own range of eco friendly paint in 2011 under the banner Harris & Thompson Paint Company.

However we do understand the clients choice and more often that most the client may decide that a different product suites their needs.

That's why we now use a new paint solidifier introduced by Dulux we can now dispose of all paints in the correct manor and safely.

Adding to this we have recently invested in an empty can crushing system, all of our empty paint tins are now recycled, with none of our empty cans go to landfill.
